SBA SHIPYARD			
PAB OIL & CHEMICAL SERVICE			
GULF COAST VACUUM SERVICES			
D.L. MUD, INC.			

## **Remedial Branch update for Tropical Storm Harvey Report for 8/31/17**

### **Superfund NPL Sites**

Two National Priorities List (NPL) Superfund sites were inspected on August 30, 2017, to assess impacts from the hurricane. The two sites are the Falcon Refinery Site and the Brine Service Site both located in Corpus Christi, Texas. Neither site showed significant damage requiring emergency clean-up.

Region 6 Remedial Project Managers continue to monitor and assess the status of NPL sites in the impacted areas. Some sites continue to be inundated with flood water. Assessments of those site will be conducted as flood waters recede. The San Jacinto River Waste Pits site is experiencing severe flooding. The highest point of the temporary cap is under 5-feet of flood water. Floodwaters are not expected to recede for several days. The US Oil Recovery Site responsible parties notified the NRC that low-levels of contaminants in residual sludge from the former wastewater treatment plant are being released into floodwaters. Other impacted sites are experiencing varying degrees of flooding with no reported releases.
